## Education

<b>The Hong Kong Polytechnic University</b> <ul style="list-style-type: none"><li>• Ph.D., Computer Science</li><li>• Supervisor: Prof. Yuanqing Zheng</li></ul>	<b>Hong Kong, China</b>	<b>May 2024 – Now</b>
<b>Central South University</b> <ul style="list-style-type: none"><li>• MSc, Computer Science and Technology, GPA: 3.49/4</li><li>• Thesis: Research on Multiple Environments Reuse of Gesture Recognition Based on RFID</li><li>• Supervisor: Prof. Shigeng Zhang</li></ul>	<b>Changsha, China</b>	<b>Sep 2020 – Jun 2023</b>
<b>South China Agricultural University</b> <ul style="list-style-type: none"><li>• BSc, Computer Science and Technology, GPA: 4.22/5</li><li>• Supervisor: Prof. Shuangjuan Li</li></ul>	<b>Guangzhou, China</b>	<b>Sep 2016 – Jun 2020</b>

## Publications

- **Zijing Ma**, Shigeng Zhang et al., "RF-Siamese: Approaching Accurate RFID Gesture Recognition With One Sample," in IEEE Transactions on Mobile Computing, 2022. [\[PDF\]](#)
- Shigeng Zhang, **Zijing Ma** et al., "HearMe: Accurate and Real-time Lip Reading based on Commercial RFID Devices," in IEEE Transactions on Mobile Computing, 2022. [\[PDF\]](#)
- Shigeng Zhang, **Zijing Ma** et al., "Real-time and Accurate Gesture Recognition with Commercial RFID Devices," in IEEE Transactions on Mobile Computing, 2022. [\[PDF\]](#)
- **Zijing Ma**, Shuangjuan Li and Dong Huang, "Exact algorithms for barrier coverage with line-based deployed rotatable directional sensors," 2020 IEEE Wireless Communications and Networking Conference (WCNC), 2020, pp. 1-7. [\[PDF\]](#)

## Research Experience

- |  |                            |
|--|----------------------------|
| <b>Accurate and Few-shot RFID Gesture Recognition</b>  | <b>Apr 2021 – Oct 2022</b> |
| <ul style="list-style-type: none"><li>• Role: Collected and processed raw signals, implemented network model and analyzed results using PyTorch and Matlab.</li><li>• Project Description:<ul style="list-style-type: none"><li>* Researched how to achieve accurate gesture recognition using RFID with less training samples (<i>e.g.</i>, one sample for each gesture) so that the system can deploy to a new environment with lower training cost.</li><li>* Proposed RF-Siamese, a novel approach that leveraged short-time Fourier transform and Siamese network to extract informative features from RFID signals. Achieved high recognition accuracy with only one sample per gesture.</li></ul></li><li>• Achievements: The work RF-Siamese was accepted by <b>IEEE Transactions on Mobile Computing</b>.</li></ul> |                            |
| <b>Real-time RFID Gesture/Word Recognition</b>   | <b>Oct 2020 – Dec 2021</b> |
| <ul style="list-style-type: none"><li>• Role: Collected and processed raw signals, implemented network model, and analyzed results using PyTorch and Matlab.</li><li>• Project Description:<ul style="list-style-type: none"><li>* Researched how to achieve real-time and accurate activity recognition systems using RFID.</li><li>* Proposed ReActor and HearMe, two approaches that extracted features from both the time and frequency domains of RFID signals for gesture and word classification, respectively.</li><li>* Employed the random forest algorithm for gesture and word classification, respectively.</li></ul></li><li>• Achievements: The works ReActor and HearMe were both accepted by <b>IEEE Transactions on Mobile Computing</b>.</li></ul>  |                            |
| <b>Algorithms for Barrier Coverage with Directional Sensors</b>  | <b>Apr 2019 – Dec 2019</b> |
| <ul style="list-style-type: none"><li>• Role: Designed and simulated the algorithms.</li><li>• Project Description:<ul style="list-style-type: none"><li>* Researched how to form barrier coverage with directional sensors.</li><li>* Proposed two algorithms to theoretically judge whether there exists a barrier and how to form a barrier.</li></ul></li><li>• Achievements: The work was accepted by <b>WCNC 2020</b>.</li></ul>   |                            |

## Prizes and Awards

- China Postgraduate mathematical contest in modeling, National Second Prize
- National English Competition for College Students, National Second Prize

- Huawei Scholarship
- Central South University First Prize Scholarship
- National English Writing Competition, Second Prize
- South China Agricultural University Second Prize Scholarship

## **Working Experience**

---

### **China Unicom Software Research Institute**

**Jul 2023 – Apr 2024**

*Big Data Development Engineer*

- Job Description:
  - \* Managed China Unicom's business data using the Hive database in the Hadoop cluster.
  - \* Designed features of business and applied the Random Forest algorithm to classify business into distinct debt collection difficulty levels, enabling the provision of tailored debt collection strategies.

## **Research interests**

---

Sensing Systems, Mobile Computing, Internet of Things, Human-Computer Interaction, Large Language Model.

## **Technical Skills**

---

- English Proficiency: TOEFL 101 (Reading 26, Listening 28, Speaking 23, Writing 24).
- Programming Language: C, Java, Python, Matlab.
- Familiar with deep neural networks. Able to design complex deep neural models using PyTorch.
